Unit 1 Technical Communication

Definition- Technical communication is used to convey scientific, engineering, or other technical information.
Importance- The purpose of a Technical Communicator is to create content that must be easy to understand, focused. The value of this is that it instills a sense of confidence in the user, allowing them to complete the task as efficiently and effectively as possible.
Ethical Value/ Objectivity- Telling the truth and providing information so that a reasonable audience is made aware of the behavior. Honesty should be in it.
Area- Among the skills that technical communication develops are technical writing & editing, coding, user experience & web design, audience analysis, content development, marketing & promotion, data analysis & visualization, and proposal & grant writing.
Features- Good technical communication is accurate, clear, concise, coherent, and appropriate. In the prose of science and technology, these qualities are sometimes difficult to achieve.
Main Goal- Ultimately, the goal of technical communication is to transmit important information as effectively and efficiently as possible—information that allows you and the people around you to do your jobs well.
The 3 Most Common Types of Technical Writing: Traditional: Repair manuals, medical studies.

End-user documentation: Electronics, consumer products.
Technical marketing content: Press releases, catalogs.

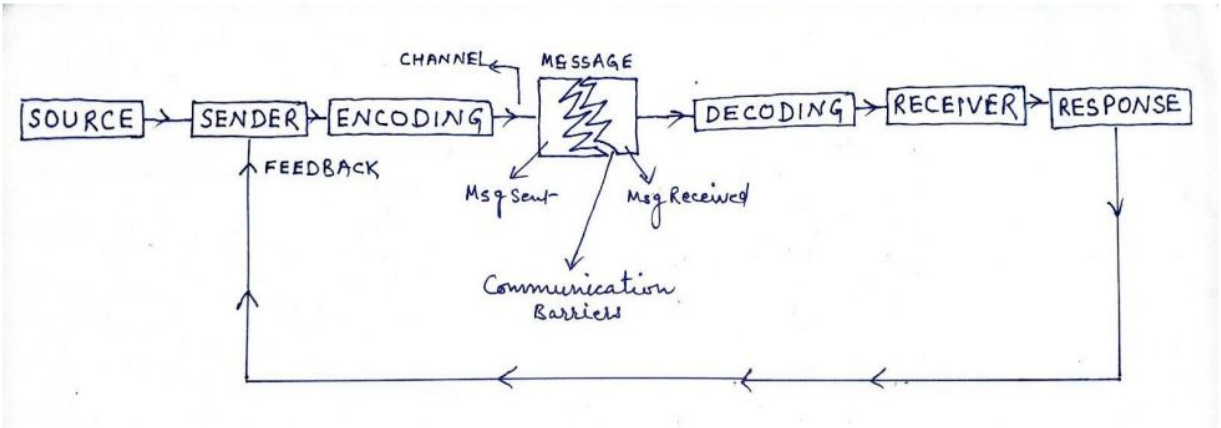

Communication Process

One Way Communication Process. When the sender collects the information from a source, and then he arranges and organizes it. Now he encodes it by giving linguistic signals, and prepares a message. Now he selects a proper channel, avoiding the communication barriers, and sends the message to the receiver. The receiver uses his knowledge and experience and decodes the message. But, he doesn't have the facility of sending the immediate response and feedback to the sender. This entire step by step activity is called the One-way Communication Process.

Two Way Communication Process When the sender collects the information from a source, arranges and organizes it. Now he encodes it by giving linguistic signals, and prepares a message. Now he selects a proper channel, avoiding the communication barriers, and sends the message to the receiver. The receiver uses his

knowledge and experience to decode the message. Now the receiver prepares his response and sends it to the original sender who checks the response. Now this response is called feedback.This entire step by step activity is called the Two-way Communication Process.

Elements of Communication Process

Source, Sender, Encoding, Message, Channel (Medium), Communication Barriers, Decoding, Receiver, Response, Feedback

---

Scope of Communication

The large scope of communication can be seen from the following two angles.

[1] Communication Encompasses Different Ways- Verbal, written, non-verbal, oral, telephonic, formal, informal, technical, non-technical, internal, external, mass communication etc

[2] Communication Encompasses Different Field of Life

1.Social aspect of Communication- Humans are social beings and are related /connected to each other on the grounds of humanity, compassion etc. Communication helps us share joys, sorrows, develop a social bondage with each other. It helps to determine social behavior of beings, inspires and motivates people according to their interests and makes them ready for life struggles.

2.Communication in personal life: Communication is closely related with every sphere of human life. From dawn to sleep at night, a person communicates with others. This reveals that communication is the part and parcel of human life.**3.Communication in the state affairs**: Communication is also pervaded in all areas of state affairs. Without communication, the state neither can administer its various wings nor can maintain relationships with the other part of the world. Due to revolutionary change in communication technologies, the whole world has turned into a global village.**4.Communication in business**: In this post-modern age, we cannot think of business without communication. Communication is the lifeblood of business as it provides necessary information in formulating business plans and policies. It also ensures effective performance of business activities like production, distribution, finance, warehousing etc. Thus; ultimate success of the business depends on successful communication.**5.Communication in management (Hierarchical Communication)** Management is the means of achieving organizational goals. Efficiency and effectiveness of management depend on effective communication with the various internal and external parties.

Every function of management depends on communication. In fact, without information plans cannot be formulated, activities cannot be organized, directives cannot be issued and control cannot be ensured.**6.Communication in industrial relations**: Industrial relation means a labor management relationship in the industry or in an organization. Congenial industrial relation is a precondition for **business success**. On the other hand, free and fair communication is a prerequisite for creating good industrial relations. Free flow of information lessens doubt, confusion and controversies between workers and management. As a result, harmonious relations develop in the organization.**7.Communication in international affairs**: In this age of globalization, communication is not merely confined within the national boundary. Countries are exchanging their cultural, economical, social, political, educational and technological affairs with each other continuously. In order to facilitate cooperation and communication among countries, various regional and international bodies namely the United Nations, World Bank, NAFTA, SAFTA, ASEAN, SAARC, EU etc. Have been formed. Through these bodies, counties communicate various bilateral and multilateral issues among them.**8.Communication in religion**: Communication is also present in perching, spreading and ci[6]rculation various religious doctrines. Prophets and saints have preached the verses of almighty to their followers and even now, many religious thinkers are performing the duty of preaching and circulating religious verses.

Relevance and Importance of Communication in Globalized World 1. For the harmony among various societies and cultures in the world by sharing their ideas, knowledge, societal practices, beyond international borders.2. For sharing technological innovations, inventions, discoveries and trends among different nations and societies. Advent of the internet has brought revolutionary change in this field.3. For spreading their ideology and educational practices by the dominant countries among weaker nations and societies to control and influence them.4. For successful trade and commerce activities among far and near countries or states.5. For strong strategic and defence alliance among various countries, quick and reliable communication is needed.6. For food security, a globalized effort can be initiated by establishing relevant and reliable communication among various countries.7. To combat environmental challenges, a globalized communication is the need of the hour.8. The telecom sector progress and inventions like global infrastructure of technology, wireless system, internet, and undersea fiber etc, all these inventions are capable of exchanging the important information at unbelievably fast speed across the world.

Forms of Communication (1). Intrapersonal is a term that describes communication in your internal being. What exactly does that mean? Well, it basically refers to how you talk with yourself. Self-talk can encompass such behaviors as the

thoughts you think, affirmations you recite, and the mental notes you make throughout the day.(2). Interpersonal refers to interaction between two or more people. It follows then, that interpersonal communication involves communication between two or a few people. This is one of the most easily identifiable forms of communication because it is in our everyday lives at nearly every moment.(3). Computer based communicationThis term wraps all forms of communication that takes place between people into one. Computer mediated communication allows people to talk through email, texting, blogging, instant messaging, tweeting or chatting on social networks such as the snap shot below of Facebook. All of these forms are used socially and in the world of business. Today a lot of Americans do not communicate face to face because, they find that it is much more convenient to catch up on the latest gossip or take care of work related business on the computer.(4). Interviewing- It involves questions and answers. Through an interview you can learn about others and their knowledge on different things. Job interviews and auditions can also be included in this category.(5). Small Group Communication- In a group of 5-10 people is considered small group communication. As students, we encounter this type of communication frequently in the classroom, especially when working on group projects. Small group communication is less personal than interpersonal communication, however, both utilize the same basic skill set.(6).Public speaking is communication between a speaker and an audience.When public speaking occurs, it can range

from two people to several hundred people. Through public speaking it is the speaker's job to inform or persuade the audience on what he or she is trying to sell/ market.(7).Mass communication is the biggest form of communication. It involves sending a message from one source to many receivers.(8).Organizational communication refers to the various forms of communication that occur within an organizational setting among members. That setting could be a multi-level corporation in a large city or it could be in a small town bakery. No matter the location, organizational communication is an important facet of every business.

Unity in communication (1).Unity can be created by communicating with others with interest and curiosity.**(2).**Listening to others with concern and attention.**(3)**. Speaking with others with respect, love and sympathy**(4)**. Writing with courtesy and gratitude.**(5)**. Avoiding sarcasm, aggression, irritation, impatience, arrogance etc in communication.

Unity of thought in a Passage or Speech (1). Keep in mind the subject or topic.**(2).**Keep in mind the subject matter or theme of the topic.**(3).**Avoid digression and adopt concentration.**(4).**Discuss or mention all the related points or facts.**(5)**.Use proper terminology and standard words and

sentences to keep the receiver focused.**(6).** Avoid lacunae in the speech or passage.

Brevity in Communication

The use of minimum possible words in communication is called brevity, conciseness or briefness.

(1) "Brevity is the soul of wit"– Shakespeare. It shows a person's intelligence and wisdom.

(2) It saves the time and energy of both sender and receiver.

(3) Brevity is effective only if completeness of the matter is preserved.

(4) To bring brevity, a sentence should be changed into a clause or phrase.

(5) If possible, one word substitutions should be used for clauses, phrases and sentences.

(6) Two or more sentences should be combined with suitable conjunctions.

(7) Double entry should be avoided (a) fully complete– complete (b) headache in the head– headache (c) actual fact– fact (d) 10 am in the morning– 10 am

(8) Suitable verbal forms should be used (a) Come to the conclusion– Conclude (b) Take/ make a decision– Decide (c) Take into consideration– consider (d) Draw a circle around it– Encircle it

(9) Avoid verbosity, use concise language (a) At the time of writing– At present/ currently (b) By the reason of the fact that/ due to the fact that– Because (c) Subsequent to– After. (d) In the event of– If (e) In the near future– Soon

(10) Use active voice if possible.

(11) Use the helping verbs properly or avoid them if possible (a) He is going to buy a new car tomorrow– He buys a new car tomorrow. (b) The thief is/ was arrested- The thief arrested.

Clarity in Communication

Avoiding confusion and expressing one single meaning, enabling the receiver to easily understand the message is called clarity in communication.

(1) Only precise words should be used to avoid confusion, word power should be very strong for it.

(2) Multiple meanings of a word should be kept in mind (homonyms) Bank, Table, Address, (homophones) I, eye; pear, peer; (homograph) Wave (n) & (v) File (n) & (v) a word has different parts of speech.

(3) Preposition should be used properly– (a) I agree with you (sb) (b) I agree to your offer (sth)

(4) No ambiguous, vague or unintelligible language should be used.

(5) Slang, archaic, dated, non-standard, informal words should be avoided.

(6) Technical terms should be used properly to bring clarity in technical communication.

(7) Pronunciation should be correct.

(8) Grammar should be correct.

(9) Information should be logically arranged to bring clarity.

(10) Audience awareness is important for the sender to convey his thoughts/ information properly. Jargon should be used carefully.
